

INFORMATION SYSTEMS

Admission to Program

Admission to the program is explained in the HCT Admission Policy described in the Academic Policies section of this Catalogue.

Program Mission

The mission of the Bachelor of Information Systems is to produce graduates who can successfully align information technology and business processes to address organizational needs. The graduates should be equipped with core Information technology and information systems skills, knowledge, and work competencies to create, implement, and manage IT solutions in response to business challenges and requirements. The program aims to prepare graduates for direct entry into positions related to the management of information systems within organizations. In addition to theoretical and technical skills, the program prepares students to adapt to complex and evolving technological environments such as those observed in the workplace, apply ethical standards, and use various communication approaches in their interactions with others.

Program Description

The Bachelor of Information Systems program prepares students to apply ethical values to complex and unpredictable problems and to plan, design, implement, evaluate, and manage an organization's ICT infrastructure. The program provides students with the required knowledge, skills, and competencies in the areas of information technology assets, archival, and information processing systems. Throughout the program, students learn to apply fundamental concepts and skills from a variety of information technologies and develop an understanding of the role of information systems within organizations.

Students also develop professional work competencies to complement their technical skills and apply high level special administrative responsibilities including leading multiple and complex groups. Within each concentration, students learn to apply current and advanced techniques, skills, and tools; analyze organizations and user needs; create and evaluate computer-based solutions, and implement information systems solutions in a given organizational environment.

The program offers a concentration in:

• Business Solutions

Students have the option to exit the program with a Higher Diploma degree after completion of the third year (see Completion Requirements below).

Program Goals

The goals of the Bachelor of Information Systems - Business Solutions program are to:

- Produce graduates who can successfully align information technology and business processes to address organizational needs.
- Develop student knowledge and skills to create, implement, and manage IT solutions in response to business challenges and requirements.
- Prepare graduates for direct entry into positions related to the management of information systems within organizations.

- Prepare graduates who can adapt and evolve in complex technological environments such as those found in the workplace and accept social responsibility at large.
- Produce graduates who contribute to and observe ethical standards and use various communication approaches in their interactions with others.

Program Learning Outcomes

Bachelor of Information Systems

Graduates will be able to:

- Apply knowledge of computing and mathematics
- Appropriate to the discipline
- Analyze a problem, and identify and define the computing requirements appropriate to its solution.
- Design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
- Function effectively on teams to accomplish a common goal
- Understand professional, ethical, legal, security and social issues and responsibilities
- Communicate effectively with a range of audiences
- Analyze the local and global impact of computing on individuals, organizations, and society
- Recognize the need for and an engage in continuing professional development
- Use current techniques, skills, and tools necessary for computing practice.

Business Solutions Concentration

Graduates will be able to:

- Exhibit a critical awareness of a range of relevant principles and theoretical knowledge to develop strategies and solutions to business problems.
- Demonstrate a critical awareness of the core functions of business administration (including management, accounting, human resources, and finance).
- Employ analytical skills to formulate business solutions in order to manage and maintain organizations' information system effectively.
- Determine e-business strategies and infrastructure requirements for an organization to develop e-business applications

Requirements

Completion Requirements

Bachelor of Information Systems

Students must successfully complete a minimum of 135 credits, including:

Code	Title	Credit Hours
	Information Systems Core Courses	60
	Business Solutions Concentration Courses	36
	4000 Elective Courses	6
	General Studies	33
	Total Credit Hours	135

Higher Diploma in Information Systems Exit Option

Students must successfully complete a minimum of 105 credits, including:

Code	Title	Credit Hours
Information Systems Core Courses		48
Business Solutions Concentration Courses		27
General Studies		30
Total Credit Hours		105
