

MARINE TRANSPORT : BACHELOR OF APPLIED SCIENCE

Overview

Program Mission

The mission of the degree program is to give education and training to cadets to enable them to pursue a career as a navigating officer at sea. The degree includes the required academic component for the certificates of competency up to Master's level. These certificates will be issued by the Federal Transport Authority once the cadets have sufficient seagoing experience.

Program Description

Accredited by the Commission for Academic Accreditation (CAA) UAE. This program provides students with the necessary education and training to become a navigating(deck) officer onboard ships. It covers the academic components required by the Standards of Training, Certification and Watch Keeping for Seafarers (STCW) international convention of the International Maritime Organization (IMO) up to Master's level. The program also includes practical seagoing service with guided study, and provided sufficient sea service is obtained by the end of the third year Students can apply to the Federal Transport Authority for the Certificate of Competency as Officer of the Watch. In order to obtain higher level Certificates of Competency, students will be required to complete the degree program in full and, undertake further seagoing service and apply to the Federal Transport Authority.

Program Goals

The aim of the program is to produce merchant navy officers of character and vision. The internationally recognized curriculum is designed to ensure that each graduate enters the UAE merchant navy profession as deck officer with the unique combination of education and professional skills required by a deck officer leading up to ship's master.

In addition to the generic graduate outcomes related to graduates of the Higher Colleges of Technology, cadets, upon completion of the program, will be able to:

- Demonstrate a knowledge base in marine transport, navigation and technology, suitable for a career as a deck officer.
- Employ the necessary seamanship, communication and navigation skills to safely operate merchant vessels.
- Show appropriate officer-like qualities of discipline, leadership, management and teamwork.
- Manage and reflect on their own work, lifelong-learning and professional development.

Program Learning Outcomes

Upon graduation, a HCT graduate in Bachelor of Applied Science in Marine Transport should have the ability to:

1. Demonstrate the competency to undertake the tasks, duties and responsibilities of a ship's master
2. Demonstrate a knowledge base in relevant marine related topics suitable for a career as a marine professional

3. Effectively lead, work and communicate in a team
4. Expand knowledge and capabilities through continuing education or other lifelong learning experiences
