

# GENERAL ACADEMIC REQUIREMENTS DIVISION (GARD)

## Divisional Mission

*The Mission of GARD is to:*

- Enhance and integrate the academic and personal development and growth of HCT students through the development of a student-centered learning environment that will provide a comprehensive array of innovative programs, resources and services.
- Facilitate the successful transition of new students to their career programs by enhancing student engagement, integrating academic and co-curricular programs, and fostering both independent and lifelong learning.

## Senior Staff

Mr. Rami Hamdan, Director – General Academic Requirements

## Programs Offered

*The following programs are offered at each HCT campus:*

- Academic Success
- General Studies
- Arabic and Emirati Studies

## Academic Success Program (ASP)

Through its proactive and innovative programs, the ASP design opportunities for students to achieve academic goals and develop as lifelong independent reflective learners. It aims to Support students in their efforts to achieve their academic goals and successfully align themselves with the HCT2.0 new curriculum framework and its challenging educational environment.

### General Objectives

As an interconnected unit of the General Academic Requirements Division (GARD), ASP aims to support and encourage academic student development outside of class time both on-campus and on-line as an integral part of the HCT student experience in synch with the academic courses. Additionally, ASP aims to coordinate tutoring and academic support to all HCT students in all major programs.

### ASP Vision

Three inter-related programming strands are to be designed and released sequentially:

- Learning Centers (Academic Success Centers)
- Skills (both Study Skills and 21st Century Skills)
- Developmental Advising / Mentoring (extended Orientation to Major Selection)

### Description

As a broad description, ASP intends to connect and guide students through a First-Year Experience along the three strands, from pre-enrolment (high school) through an extended orientation, through a guided program of self-development and major selection where the

responsibility remains always the student's, through academic support during their classes, until graduation.

ASP subscribes to an "at-the-point-of-need" philosophy in program delivery, meaning that a proactive advising model determines when an intervention is necessary for a specific student, and not all students need to receive the same mass delivery. In other words, ASP support is customized according to each individual student's need.

Further, ASP also commits to a philosophy of early intervention and aims to activate academic support at the earliest sign of need, based on Faculty referrals.

In order to achieve its strategic objective of supporting students' academic performance with out-of-class study, ASP has launched 14 Academic Success Centers across the HCT network of male and female campuses in the UAE, and an online tutorial tracking system now available to all HCT Faculty and Staff – tutTrak.

The Centers, a cornerstone of the HCT's Academic Success Program, provide academic and developmental training services to students by seeking to improve the performance of students who need academic support, as well upgrading their study skills. In addition, the Academic Success Centers attract outstanding students, offering training and workshops that enhance their leadership abilities and future skills, in order to offer them opportunities to tutor and mentor their peers through **Peer Tutoring**.

## General Studies

General Studies Program is dedicated to supporting, developing and mentoring all HCT students to reach their full communicative, intellectual, literacy and vocational skills potential.

This is achieved through a cross-curricula approach that challenges students to reflect and develop holistically by providing them with continual applied learning opportunities that broaden their global perspective, critical thinking, problem-solving and information synthesis skills in preparation for the 4<sup>th</sup> industrial revolution economy using 21<sup>st</sup> Century Skills .

## Arabic & Emirati Studies

Arabic and Emirati Studies courses are designed to assure that students are proficient in Arabic, the official language of the country and familiar with the history, tradition and culture of the region. The Arabic and Emirati studies courses are included under the General Studies course plan as per CAA course category requirement.

## Admission to Program

As per details in each Academic Division and general admission requirements of HCT.

## Program Description

General Studies courses form an integrated suite of courses that empowers students to meet the challenges of college, the workplace, and life by enabling students to acquire essential 21st century practical skills and competencies in the areas of effective oral and written communication in Arabic and English, creative and critical thinking and problem solving, multiple forms of data gathering and analysis, moral and ethical decision-making, tolerance and multicultural sensitivity while

maintaining the unique national identity and Arab cultural background of the UAE, teamwork and collaboration, and understanding the integrative and cumulative nature of knowledge acquisition.

The structure of the General Studies (GS) Courses is aligned with the CAA Standards for Licensure and Accreditation (2019) and consists of the following categories

1. English language;
2. Arabic language;
3. Islamic studies;
4. UAE studies.
5. Social Science
6. Natural Science
