

# MEDICAL LABORATORY SCIENCE

## Admission to Program

Admission to the program is explained in the HCT Admission Policy described in the Academic Policies section of this Catalog.

## Program Mission

The Bachelor of Medical Laboratory Science at the Higher Colleges of Technology aims to produce skilled Emirati professionals in medical laboratory sciences who are work ready as medical laboratory science professionals delivering diagnostic care to a wide variety of patients/clients.

## Program Description

The Bachelor of Medical Laboratory Science is a four-year professional program. Graduates are trained biomedical scientists who possess a broad range of knowledge in medical laboratory diagnostics with the ability to work proficiently and are culturally competent to deliver care to a wide range of clients/patients. The four years of undergraduate study integrates biomedical science theory, laboratory skills and supervised professional practice in a variety of clinical settings. Medical laboratory scientists are specialized in the area of clinical diagnostics, producing accurate results required by physicians and health care team members for treatment and management of patients and clients. Graduates possess professional knowledge in the areas of haematology, immunology, transfusion science, clinical chemistry, microbiology, molecular and cellular pathology, with the potential to specialize and advance their skills in specialist areas. These skills can be easily transferred to work competently in public health labs, municipality and forensic labs and in the biotechnology industry. Graduates who are successful in their program can take the credentialing exam for the American Society of Clinical Pathologists International (M.T ASCPi), which provides access to society activities and program recognition for those students who wish to advance their education into graduate studies.

Students are eligible for a one year Work Experiential Learning experience during their study.

## Program Learning Outcomes

### Bachelor of Medical Laboratory Science (Medical Laboratory Scientist) (NQF Level 7)

*On successful completion of this program the graduate will be able to:*

1. Interpret and apply knowledge, management and decision making aspects to provide quality medical laboratory diagnostic services in variety of healthcare settings.
2. Demonstrate knowledge of healthcare regulations and integrate deep knowledge of relevant technological advances and evidence-based practice to address challenges in the field of laboratory medicine.
3. Demonstrate effective cognitive and technical skills to analyze clinical specimens, formulate solutions and identify risks in order to deliver laboratory decisions to support and enhance clinical care.
4. Demonstrate skills in using equipment and advanced technologies, information systems, and communication devices that support safe medical laboratory practice in a variety of healthcare settings

5. Apply clinical research skills to investigate problems in the medical laboratory discipline and to assess and evaluate quality procedures as relevant.
6. Demonstrate professional and technical leadership attribute and be able to lead and work collaboratively within a multidisciplinary team in a diverse range of clinical laboratories to ensure safe medical laboratory practice.
7. Demonstrate the ability to apply entrepreneurship and innovation skills to incorporate new solutions into medical laboratory practice.
8. Demonstrate professional attributes relevant to their role as medical laboratory technologists in the clinical laboratories.

## Requirements Completion Requirements

Bachelor of Medical Laboratory Science

**Students must successfully complete a minimum of 126 credits as follows:**

Code	Title	Credit Hours
Health Science Core Courses		24
Medical Laboratory Science Core Courses		54
Medical Laboratory Science Preceptorship Courses		15
General Studies		33
<b>Total Credit Hours</b>		<b>126</b>
