

# VETERINARY SCIENCE

## Admission to Program

Admission to the program is explained in the HCT Admission Policy described in the Academic Policies section of this Catalog.

## Program Mission

The Bachelor of Veterinary Science program produces national veterinary bioscientists who have expertise in the following areas: animal and food biosecurity, public health, livestock production and health, and veterinary laboratory support services, as prioritized by Federal and Local UAE Authorities.

## Program Description

The Bachelor of Veterinary Science program aims to produce Emirati national graduates to work as veterinary bioscientists to fulfill the need identified by the UAE government. The 4-years program provides graduates with expertise in the following areas: animal and food biosecurity, public health, livestock production and health, and veterinary laboratory support services, prioritized by federal and local UAE Authorities. This program allows full articulation of the existing Associate Degree in Veterinary Science.

Students are eligible for a one year Work Experiential Learning experience during their study.

## Program Learning Outcomes

### Bachelor of Veterinary Science

*On successful completion of this program the graduate will be able to:*

1. Apply the knowledge of ethics, policies, and regulations applicable to veterinary diagnostic laboratories and clinics, meat inspection, food safety and public health, livestock health and production, and animal quarantine.
2. Utilize evidence-based practice research and industry guidelines to improve animal wealth, production, and food biosecurity and safety.
3. Demonstrate technical skills to be applied in the development of an enterprise or to be part of an enterprise related to the animal and food biosecurity, public health, livestock health and production, and veterinary laboratory services. (Technical leader).
4. Demonstrate competency in using equipment, applying technologies and information systems that support and enhance animal and food biosecurity, public health, livestock health and production, and veterinary laboratory services
5. Demonstrate the ability to work independently and as part of a team in an evolving, competitive diverse range of animal-related, food safety and laboratory-based settings.
6. Demonstrate life-long learning competency aimed to understanding the implications of new information for both current and future problem-solving and decision-making.
7. Demonstrate entrepreneurial attributes to initiate and integrate new ideas relevant to veterinary practice in animal and food biosecurity, public health, livestock health and production, and veterinary laboratory services. (Graduating companies).
