LEVEL 5 DIPLOMA IN PROJECT MANAGEMENT

Program Description

The Level 5 Diploma in Project Management program is designed to provide learners with the essential knowledge and skills to excel in various project environments across multiple industries, catering to traditional and agile project management practices. The program focuses on developing key competencies, such as understanding project management principles, effective communication, collaboration, planning, and adaptation to different project development approaches. Learners will gain practical experience Learners will gain practical experience not only through application-based modules but also through actually spending half their time in the entire program, working in an actual industry, thereby enhancing their readiness for professional roles within the project management sector.

Program Learning Outcomes

Upon successful completion of this program, the graduates will be able to:

1. Explain project management fundamentals and methodologies across diverse environments.
2. Demonstrate knowledge of suitable development approaches for projects.
3. Develop project planning documents for both Predictive and Adaptive projects.
4. Engage in effective communication with stakeholders to support team performance in various project settings.
5. Apply project management tools and techniques throughout the project lifecycle.
6. Monitor and Report project performance to the stakeholders.

Occupation and Industry Sector
