

CHEMICAL ENGINEERING TECHNOLOGY: BACHELOR

Overview

Program Mission

Prepare graduates to be successful as technicians and engineers embracing innovation and discovery and striving for life-long learning and professional development in the field of Chemical Engineering Technology.

Program Description

The Bachelor of Chemical Engineering Technology program provides an excellent broad education with a focused area of specialization options to cater to the global and local industries. The Bachelor of Chemical Engineering Technology curriculum covers the laws of chemistry, physics, and mathematics which form the basis of many industrial processes in areas such as energy, oil and gas, chemical processing, etc. The program prepares students for positions as engineers with the technical and managerial skills necessary to enter careers in the design, manufacturing, operation, and maintenance of chemical processes. Students will gain practical knowledge in heat and mass transfer in plants and process control design projects. The Bachelor of Chemical Engineering Technology curriculum produces high-quality engineers known for productivity, timeliness, dedication, and competence in the workplace.

Graduates typically have strengths in applied design, development, and implementation of chemical engineering systems. They have the ability to work logically, accurately and efficiently; to gather and use information effectively; and to continue enhancing their careers through lifelong learning. The program stresses the effective use of technology, information resources and engineering tools. The program instills leadership qualities based on moral and ethical principles coupled with sound and rational judgment. Finally, the program is designed to prepare interested students for graduate studies in Chemical Engineering Technology and other related areas of professional practice.

Program Goals

1. Provide chemical engineering professionals with the technical knowledge and skills required by the industry to perform to highest level of industry standards.
2. Prepare graduates for a successful career as effective decision makers with strong communication and teamwork skills and an understanding of the global, ethical and social implications of the industry and engineering profession.
3. Prepare graduates with strong commitment and strategic mindset to lifelong learning, continuing education, and professional growth.
4. Prepare graduates with leadership qualities and commitment to contribute actively in achieving Abu Dhabi Vision 2030.

Program Learning Outcomes

Upon graduation, a HCT graduate in Bachelor of Chemical Engineering Technology should demonstrate:

1. An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve

broadly-defined engineering problems appropriate to the Chemical Engineering Technology.

2. An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the Chemical Engineering Technology.
3. An ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
4. An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes;
5. An ability to function effectively as a member as well as a leader on technical teams.
6. An ability to develop and evaluate a business plan to transform an engineering design (systems, products ,services and solutions) into a business opportunity utilizing entrepreneurial skills and knowledge

Requirements

Completion Requirements

Bachelor of Chemical Engineering Technology

Students must successfully complete a minimum of 132 credits, including:

Code	Title	Credit Hours
Program Core Courses		81
Program Elective Courses		6
Mathematics and Science Courses		12
General Studies course		33
Total Credit Hours		132

Faculty and Academic Staff

Abu Dhabi Men's

Abdelsalam Efhaïma, PhD Chemical Engineering, Missouri Univ of Science & Tech, USA

Abdul Rauf, PhD Chemical Metallurgy, Catholic University of Leuven, Belgium

Amjad Shaikh, PhD Chemical Engineering, University of Sheffield, UK

Asfaw Gezae Daful, PhD Chemical Engineering, Universitat Rovira i Virgili, Spain

El Awad Osman, Masters Chemical Engineering, University of Bradford, UK

Marie Lordon, PhD Organic and Bio-organic Chemistry, Sorbonne Université (Pierre and Marie Curie Campus), France

Muhammad Waqas Anjum, PhD Bioscience Engineering (Membrane Technology), KU Leuven, Belgium

Western Region Colleges

Abdelrahim Minalla, Masters Chemical Engineering, San Jose State University, USA

Meegalla Chandraratne, PhD Computer Vision & Bio Processing, Lincoln University, New Zealand

Sathiyamoorthy Manickam, Masters Chemical Engineering, Bharathidasan University, India
