

# NAVAL SCIENCE

## Admission to Program

This program is only open to Officer Cadets already employed by the UAE Defense Force. Admission to the program is conducted annually by a committee nominated by the General Head Quarters of the Armed Forces (GHQ). The number of cadets admitted to the Naval College is determined by the general policy of GHQ.

## Program Mission

The program provides graduates with the scientific/ technological knowledge, communication and leadership skills required for the exploitation of the increasingly complex technologies involved in modern naval operations. The planned integration of curriculum is aimed at producing graduates with the necessary scientific, technical, communication and cognitive skills which will enable them to function effectively as naval officers, whilst ensuring that the HCT Graduate Outcomes for graduates of the Higher Colleges of Technology are met. The program will produce graduates capable of working as effective executive officers in the UAE Navy.

## Program Description

The program has been designed to provide concurrent academic and military studies. When cadets are at the Naval College, the emphasis of their training will be on academic and professional studies to develop their intellectual capabilities, professional knowledge and vocational utility. The other important emphasis will be on military education and training to develop the qualities of character and leadership that are appropriate to officers in the UAE Naval Forces.

The program includes academic courses with naval relevance and focus, which are integrated with the professional courses and targeted specifically at the future executive officers of the UAE Navy. It provides cadets with the best possible combination of military knowledge, naval science, leadership and management skills and practical professional training.

To provide a broad base of academic skills and intellectual capacity, the program includes a general foundation of management, Emirati studies, physics, mathematics, information technology, scientific and technical courses, in addition to fundamental courses in English language and effective communication. These courses develop cadets' ability to reflect on their personal performance and capability as professional naval officers. They will, in addition, develop awareness of their nation and the world around them. Key communication skills, together with appropriate cognitive skills such as critical thinking and quantitative reasoning, will also be developed during the program.

To complete the cadets' development, the program provides a sequence of professional courses in naval sciences selected to equip them with the knowledge required to assume a leadership position in the UAE Naval Forces. The midshipmen training program works in conjunction with the professional naval courses to provide students with a diverse learning experience.

## Program Goals

The aim of the program is to produce naval leaders of character and vision. Officers will ascribe to the Naval College's core values of integrity first, service before self, and excellence in all that they do. To that end, the curriculum is designed to ensure that each graduate enters the UAE Navy

with the unique combination of education and professional skills required by a naval officer.

*In addition to the generic graduate outcomes related to graduates of the Higher Colleges of Technology, cadets, upon completion of the program, will be able to:*

- Demonstrate a knowledge base in Naval science, navigation and technology, suitable for a career as a naval professional.
- Employ the necessary seamanship, communication and navigation skills to safely operate military vessels.
- Show appropriate officer-like qualities of discipline, leadership, management and physical fitness.
- Deploy a range of scientific, technical, communication and transferable skills which will enhance their effectiveness in their chosen career.
- Manage and reflect on their own work, lifelong-learning and professional development.

PLO 5. Confidently exhibit navigational, communications, and operational skills in multi-platform, multi-threat naval scenarios.

PLO 6. Demonstrate sound knowledge of Rules of Road, and Rules of Engagements at sea.

## Requirements

### Completion Requirements

#### Bachelor of Naval Science with Diploma Exit

##### Completion Requirement – Bachelor's Degree

Students must successfully complete a minimum of 134 semester credits including

Code	Title	Credit Hours
General Studies Courses		33
Naval Science and Engineering Core Courses		30
Naval Professional Core Courses		56
Midshipman Sea Training Courses		15
<b>Total Credit Hours</b>		<b>134</b>

##### Completion Requirement – Diploma Exit

Students must successfully complete a minimum of 110 semester credits including

Code	Title	Credit Hours
General Studies		33
Naval Science and Engineering Core Courses		30
Naval Professional Core Courses		32
Midshipman Sea Training Courses		15
